<td>High</td>
</tr>
</tbody>
</table>

LOCTITE® 640™ is designed for the bonding of cylindrical fitting parts. The product cures when confined in the absence of air between close fitting metal surfaces and prevents loosening and leakage from shock and vibration. Typical applications include retaining keys and splines, eliminating backlash in worn assemblies, retaining bearings in place - preventing spin out, retaining rotor to shafts in fractional and subfractional horsepower motors, retaining bushings and sleeves in housings and on shafts, augmenting press fits, restoring the fit to worn assemblies or out of tolerance parts.

**TYPICAL CURING PERFORMANCE**

Cure Speed vs. Substrate

The rate of cure will depend on the substrate used. The graph below shows the shear strength developed with time on steel pins and collars compared to different materials and tested according to ISO 10123.

Cure Speed vs. Bond Gap

The rate of cure will depend on the bondline gap. The following graph shows the shear strength developed with time on steel pins and collars using Activator 7471™ at different controlled gaps and tested according to ISO 10123.

Cure Speed vs. Temperature

The rate of cure will depend on the temperature. The graph below shows the shear strength developed with time at different temperatures on steel pins and collars using Activator 7471™ and tested according to ISO 10123.

**TYPICAL PROPERTIES OF UNCURED MATERIAL**

* Applies to material made in N. America
Flash Point - See SDS

MIL-R-46082B

LOCTITE® 640™ is tested to the lot requirements of Military Specification MIL-R-46082B. **Note:** This is a regional approval. Please contact your local Technical Service Center for more information and clarification.

ASTM D5363

Each lot of adhesive produced in North America is tested to the general requirements defined in paragraphs 5.1.1 and 5.1.2 and to the Detail Requirements defined in section 5.2.
Cure Speed vs. Activator
Where cure speed is unacceptably long, or large gaps are present, applying activator to the surface will improve cure speed. The graph below shows the shear strength developed with time on zinc dichromate steel pins and collars using Activator 7471™ or 7649™ and tested according to ISO 10123.

TYPICAL PROPERTIES OF CURED MATERIAL
Physical Properties:
- Coefficient of Thermal Expansion, ISO 11359-2, $100 \times 10^{-6}$
- Coefficient of Thermal Conductivity, ISO 8302, 0.1 W/(m·K)
- Specific Heat, kJ/(kg·K) 0.3

TYPICAL PERFORMANCE OF CURED MATERIAL
Adhesive Properties
Cured for 30 minutes @ 22 °C, activated with Activator 7471™
Compressive Shear Strength, ISO 10123:
- Steel pins and collars
  - N/mm² ≥15 LMS (≥2,175 psi)
- Steel pins and collars
  - N/mm² * ≥11 LMS (≥1,595 psi)

* Applies to material made in N. America

Cured for 24 hours @ 22 °C
Compressive Shear Strength, ISO 10123:
- Steel pins and collars
  - N/mm² 22 (3,190 psi)

Breakaway Torque, MIL-S-46163
- N·m 20 to 40 (175 to 350 lb.in.)

Prevail Torque, MIL-S-46163
- N·m 30 to 60 (265 to 530 lb.in.)

Breakloose Torque, ISO 10964,
- Pre-torqued to 5 N·m
  - No Activator 30 to 50 (265 to 440 lb.in.)
  - Activator 7649™ 40 to 60 (350 to 530 lb.in.)

Heat Cured for 1 hour @ 93 °C, tested @ 22 °C
Compressive Shear Strength, ISO 10123:
- Steel pins and collars
  - N/mm² ≥26 LMS (≥3,770 psi)

* Applies to material made in N. America

TYPICAL ENVIRONMENTAL RESISTANCE
Cured for 1 week @ 22 °C
Compressive Shear Strength, ISO 10123:
- Steel pins and collars
  - N/mm² * ≥22.7 LMS (≥3,291 psi)

* Applies to material made in N. America

**GENERAL INFORMATION**

This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be selected as a sealant for chlorine or other strong oxidizing materials.

For safe handling information on this product, consult the Safety Data Sheet (SDS).

Where aqueous washing systems are used to clean the surfaces before bonding, it is important to check for compatibility of the washing solution with the adhesive. In some cases these aqueous washes can affect the cure and performance of the adhesive.

This product is not normally recommended for use on plastics (particularly thermoplastic materials where stress cracking of the plastic could result). Users are recommended to confirm compatibility of the product with such substrates.

**Directions for use:**

**For Assembly**

1. For best results, clean all surfaces (external and internal) with a LOCTITE® cleaning solvent and allow to dry.
2. If the material is an inactive metal or the cure speed is too slow, spray with Activator 7471™ or 7649™ and allow to dry.
3. For Slip Fitted Assemblies, apply adhesive around the leading edge of the pin and the inside of the collar and use a rotating motion during assembly to ensure good coverage.
4. For Press Fitted Assemblies, apply adhesive thoroughly to both bond surfaces and assemble at high press on rates.
5. For Shrink Fitted Assemblies the adhesive should be coated onto the pin, the collar should then be heated to create sufficient clearance for free assembly.
6. Parts should not be disturbed until sufficient handling strength is achieved.

**For Disassembly**

1. Apply localized heat to the assembly to approximately 250 °C. Disassemble while hot.

**For Cleanup**

1. Cured product can be removed with a combination of soaking in a Loctite solvent and mechanical abrasion such as a wire brush.

**Loctite Material Specification**

LMS dated July 07, 2006 (February 15, 1996). Test reports for each batch are available for the indicated properties. LMS test reports include selected QC test parameters considered appropriate to specifications for customer use. Additionally, comprehensive controls are in place to assure product quality and consistency. Special customer specification requirements may be coordinated through Henkel Quality.

**Storage**

Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

**Optimal Storage:** 8 °C to 21 °C. Storage below 8 °C or greater than 28 °C can adversely affect product properties.

Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

**Conversions**

\[(°C x 1.8) + 32 = °F\]

\[
kV/mm x 25.4 = V/mil\]

\[mm / 25.4 = inches\]

\[N x 0.225 = lb\]

\[N/mm x 5.71 = lb/in\]

\[N/mm² x 145 = psi\]

\[N/mm x 8.851 = lb/in\]

\[N x 0.738 = lb/ft\]

\[N-mm x 0.142 = oz/in\]

\[mPa-s = cP\]

**Note:**

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. The product can have a variety of different applications as well as differing application and working conditions in your environment that are beyond our control. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

Any liability in respect of the information in the Technical Data Sheet or any other written or oral recommendation(s) regarding the concerned product is excluded, except if otherwise explicitly agreed and except in relation to death or personal injury caused by our negligence and any liability under any applicable mandatory product liability law.

In case products are delivered by Henkel Belgium NV, Henkel Electronic Materials NV, Henkel Nederland BV, Henkel Technologies France SAS and Henkel France SA please additionally note the following:

Prior to any use and application of products, the customer has the responsibility to check and assure that the intended end use is in accordance with the corresponding technical data and product specifications.

In case Henkel would be nevertheless held liable, on whatever legal ground, Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

Any liability in respect of the information in the Technical Data Sheet or any other written or oral recommendation(s) regarding the concerned product is excluded, except if otherwise explicitly agreed and except in relation to death or personal injury caused by our negligence and any liability under any applicable mandatory product liability law.

In case products are delivered by Henkel Colombia, S.A.S. the following disclaimer is applicable:
